23

- specifically accident reconstruction. And
- 3 I don't know of anybody that gives a
- 4 degree -- an academic degree in it now.
- 5 It's being talked around several places.
- 6 And right now it's all short courses and
- 7 seminars and that sort of thing. 8 Q. Well, you learned your accident
- 9 reconstruction knowledge through on-the-job 10 training and seminars?
- 11 A. Right.

2

- Q. Did you go to the Northwestern School? 12
- A. No. I haven't been to Northwestern. I've 13 14 been to a number of the IPTM seminars. And
- 15 back in the '80s a number of people started
- 16 forming professional groups, professional
- organizations in accident reconstruction. 17
- I'm a member of seven or eight of those. 18
- And most of those have at least annual, if 19 20 not more frequently, meetings with seminars
- attached to the meetings. And I've been to 21
- I don't know how many of those, 60 or 70 22
- 23 or ...

1

- 1 O. Did you use Dr. Loop in this case?
 - 2 A. No, I did not.
 - Q. And define what you mean by visual perception.
 - 5 A. Being able to see something and realize that you're seeing it. In the case of 6 7 visual perception, many times we want to try to give court exhibits that are 8
 - representative of what a person saw or 9
 - didn't see. And Dr. Loop has been helpful 10
 - in doing light-level measurements and 11 12 taking photographs that were representative
 - of what people would or wouldn't see at 13
 - 14 accident sites. 15
 - Q. Have you ever testified on behalf of a party with or without the use of Dr. Loop that a particular object or vehicle could not have been seen by the -- by the party or by one of the parties in time to avoid an accident?
 - 21 A. I'm sorry. Repeat that, now. I'm thinking back over 40 years, so ... 22
 - O. Yeah. Have you ever testified on behalf of

Page 14

- Q. What does IPTM stand for?
- 2 A. That's International Police Technology --
- 3 Institute of Police.
- 4 Q. What's the M stand --
- 5 A. Institute of Police Technology and
- Management. It's a part of the University 6 7 of North Florida in Jacksonville.
- Q. Have you ever been a law enforcement 8 officer?
- A. No. 10
- 11 Q. Have you had any training or experience in
- visual perception? 12
- A. Not formal training. 13
- Q. Do you consider yourself an expert in 14 visual perception? 15
- 16
- 17 Q. If you need expert opinions in a case
- regarding visual perception, do you farm 18 19 that out or do you associate somebody?
- 20 A. It depends on what's involved. I have used
- 21 Dr. Michael Loop at the School of Optometry 22 several times in problems relating to
- 23 visual perception.

- a party involved in a motor vehicle 1
 - accident that the other vehicle or object 2
 - 3 involved in the accident was not
 - 4 discernible or that party could not have
 - 5 seen that object or vehicle in time to 6 avoid an accident?
 - 7 A. Yeah. I seem to remember a case. I was 8 working on defense for the truck that had 9 hit a pedestrian that was intoxicated and
 - somewhat into the road in dark clothing at 10 night. And I don't remember the details of 11
 - it. I just remember that general feature 12 13
 - 14 Q. Do you happen to remember the parties or 15 the attorneys involved or the --16
 - A. (Witness shakes head.)
 - Q. Could you find it on your list of --17
 - A. It was further back than my list of 18 19 testimony goes. It was probably 15 years ago or more. I can't really remember any 20
 - of the parties now. 21
 - Q. Was it a case that went to trial? 22
 - 23 A. No.

June 22, 2006

De	position of Edward L. Kobinson		June 22, 200
	Page	17	Page 19
1	Q. Do you have any medical training?	1.1	overturn versus the impact by the other
2	· · · · · · · · · · · · · · · · · · ·	2	truck, I think that we can make some
3		3	separation on that.
4		4	Q. Well, wouldn't a biomechanic
5	•	5	biomechanical expert be the proper person
6	the day-to-day surveys. It was more	6	qualified to determine what physical
7	administrative. And I've taught courses	7.	injuries on Mr. Morris' body were caused by
8	in a licensure course for	8	what particular objects during the accident
9	Q. Well, you're not a medical doctor?	9	sequence?
10	A. No, I'm not.	10	A. I'm not trying to do that.
11	Q. You don't hold yourself out as an expert in	11	Q. All right, sir.
12	this case being able to determine cause of	12	A. My general experience in overturned trucks
13	death?	13	is that the injuries that Mr. Morris
14	A. Oh, no. No. One thing that you were	14	received the very serious injuries I've
15	asking about formal education, I would go	15	never seen before in an overturned truck
16	to experience also. At one point I had a	16	accident, so I would think it highly
17	joint appointment in the forensic science	17	unlikely that these injuries would have
18	department from the justice program, a	18	been associated with the overturn. On the
19	graduate program. And I did for a period	19	other hand, impact by another vehicle of
20	of time give lectures in one of their	20	comparable mass at 70 miles an hour or 60
21	introductory graduate courses, a couple	21	miles an hour would be expected to cause
22	hours lecture on accident reconstruction.	22	some very serious injuries.
23	I didn't try to make an accident	23	Q. But you're not testifying as to any
	Page 18		Page 20
1	reconstructionist out of people in two	1	specific injuries on Mr. Morris' body were
2	hours, but I tried to show them the	2 .	caused by any specific objects during the
3	physical basis of it and show them more or	3	accident sequence?
4	less what could or couldn't be done, so	4	A. I'm not trying to bring it down to that
5	they would know when to yield for a	5	point, no.
6	reconstruction and when it wasn't going to	6	Q. You're not going to give any opinions on
7	be applicable.	7	that?
8	Q. Do you have any training in biomechanics?	8	A. I'm just going to say that I think his
9	A. No.	9	serious injuries were due to the impact,
10	Q. So you don't hold yourself out in this case	10	not the overturn.
11	as an expert in biomechanics?	11	Q. While we're on that, what at what
12	A. No.	12	speed Did you calculate a speed of
13	Q. You're not holding yourself out as an	13	the And I'm going to call for purposes
14	expert in this case on what specific	14	of this deposition And we're going to
15	injuries might have caused the death of	15	get this confused I'm sure, because I
16	Mr. Morris in this case?	16	confuse it in my mind. I'm going to try to
17	A. No.	17	differentiate between Mr. Morris' vehicle
8	Q. Do you hold yourself out as an expert on	18	by calling it the Kenworth vehicle and the
9	what in this case on what specific	19	vehicle driven by Mr. Thompson by calling
20	objects caused any specific injuries to	20	it the Peterbilt vehicle. Now, we both
21	Mr. Morris?	21	know that that's just referring to the
22	A. Well, in the sense of discerning between	22	tractor or the truck part of the rig,
3	the most likely result of the truck	23	not the trailer?

8

9

Page 29

- A. No. He has a degree in forensic science.
- 2 Q. Okay. He doesn't have -- He does not have 3 a college degree in mechanical engineering?
- 4 A. But he has completed all of the courses for 5 the bachelor's in mechanical engineering so
- 6 that the UAB graduate program admitted him 7 to the master's of mechanical engineering
- 8 program.

1

- 9 Q. So as of what date was he admitted to the 10 master's program?
- A. As of this summer. 11
- 12 O. 2006?
- A. Yeah. 13
- 14 Q. Did either -- Did Mr. Johnson do any compilation of data or calculations to 15
- 16 determine the speed of the Kenworth as it 17 left I-85?
- 18 A. I don't recall. I don't believe he did. I
- 19 think he was in this case just involved in the site mapping and drawing -- using the 20
- CAD program to draw the site map. 21
- Q. Just data collection and employing the CAD 22 for the map? 23

- there was nothing to see except the cab 1
 - 2 itself and the seat and the remains of 3
 - Q. The -- In the Kenworth, the cab portion that Johnson and Messerschmidt inspected --Did they both inspect it?
 - A. I don't think so. I think only Messerschmidt went. I can't recall whether Johnson went or not.
 - 10 Q. On that inspection, did Messerschmidt look for any equipment or instruments in the cab 11 of the Kenworth that might have had data equivalent to the kind of data you get from what we're calling the black box or a CDR?
 - A. I'm sure he did. But the boxes we're talking about are always mounted on the motors in trucks. The only -- There's one small after-market unit that is mounted in the cab, although I think it's connected to the unit on the motor. They were not very common in the middle and late '90s. But if that unit were there, they would have noted that and tried to download it --

Page 30

- A. Right. 1
- 2 O. Did either Mr. Johnson or Mr. Messerschmidt
- retrieve any black box data or 3
- equivalent-type data from the Kenworth? 4
- A. These are too old to have it. 98, 95. 5
- 6 O. Neither the Kenworth nor the Peterbilt had 7 any black box data?
- 8 A. Well, we never saw the Kenworth. We con't 9 know.
- Q. The Kenworth? 10
- A. The Kenworth, we never were able to see 11 12 that.
- Q. Kenworth is Morris' vehicle? 13
- A. I'm sorry. I've gotten -- Now I've done 14 it, reversed them.
- 15
- The Peterbilt, we never saw. We saw 16 only the cab portion of Morris' truck that 17
- had been knocked off the frame. When we 18
- 19 went to -- or they - I didn't go with
- them. When they went to the site where it 20
- was stored, the remainder of the truck, the 21 frame and motor and transmission had all 22
- 23 been parted out and the frame cut up, so

22

23

18

19

Q. I'm with you. Let me make sure I 1

understand completely. The only part of 2 the -- what I'm calling the Kenworth 3 4

tractor or truck portion of Mr. Morris' rig that was physically inspected by anyone on 5

your behalf in this case was the cab part, 6 7 the occupant part that was separated at

8 some point during the accident sequence 9 from the frame of the tractor?

- 10 A. That's correct.
- 11 Q. Neither you nor anyone on your behalf has physically inspected the engine, the motor, 12 that part of the Kenworth tractor? 13 14
 - A. That's correct.
- O. What about the framework underneath? 15
- A. That had been cut up too. I think there 16 was nothing left of it -- any of that. 17
 - Q. What about the trailer that was being pulled by the Kenworth?
- 20 A. We did not see that either.
- Q. Did either you or anyone on your behalf for 21 purposes of this case have an opportunity 22 23 to inspect any of the braking -- any parts

1	of the brake system or the electrical or	1	tractor portion and engine area to
2	light system on the Kenworth tractor or	2	determine if there were any defects or
3	trailer?	2 3	deficiencies that might have existed in
4	A. No.	4	that system prior to this accident?
5	Q. When did When did Messerschmidt	5	A. Yes. For both trucks, yes, we did not.
6	inspect And I apologize for just	6	Q. Do you know a person named LeBleu
7	referring to him by last name, but that	7	A. I don't.
8	will short-circuit some of this. When did	8	Q who's involved in the case?
9	Messerschmidt inspect the cab of the	9	A. No, I don't.
10	Kenworth?	10	Q. Do you know if or when he was able to
11	Those blue pages that you're looking	111	inspect any part of the Kenworth?
12	at, do we have a copy of that?	12	A. No, I don't.
13	A. Yes. They're in the file.	13	Q. So any opinions that you would have or that
	- · · · · · · · · · · · · · · · · · · ·		
14	Q. That's just a chronology of events?	14	your people would have regarding the
15	A. That's actually an invoice to the client	15	electrical system on this Kenworth would be
16	which includes that.	16	based on something other than an actual
17	Oh, that was the first thing that was	17	physical inspection of that system?
8	done. That was October 7, '04. Went to	18	A. Right. We did not inspect the system. We
19	Kerns Truck Parts. And I believe one of	19	did not have an opportunity to.
20	the met there was someone named Don	20	Q. And wouldn't it be fair to categorize any
21	Glenn. He may be from Rimkus. I'm not	21	opinions that you would give on the
22	sure. I think there was another expert	22	electrical system for that very reason as
23	there at the time he inspected it. There	23	speculative?
	Page 34		Page 36
1	was some other party there that was not	1	MR. PENICK: Object to the form of
2	part of our organization.	2	the question.
3 .	Q. And that was on October 7, '04?	3	Q. Wouldn't that be a fair characterization?
1	A. Right.	4	A. We haven't turned our attention to any
5	Q. By your understanding at October as of	5	problems with the electrical system. The
5	October 7, '04, the tractor framework	6	only question that's come up was could the
7	portion, engine portion of the Kenworth	7	lights of the truck have remained on after
;	unit had already been cut up and disposed	8	it overturned.
	of?	9	Q. Well And it could.
)		1	
)	A. Yes. That's what they told Messerschmidt,	10	A. That's the only specific question.
l .	that they had parted out the engine and	11	Q. And any opinion that you would give or that
?	transmission and cut up the frame.	12	Messerschmidt or Johnson would give as
3	Q. Where Do you know where the batteries	13	to as to whether the lights on the
4	were located on that Kenworth?	14	Kenworth could have been on either before
5	A. No, not exactly. The usual location is on	15	or after the rollover would have to be
5	the left side of the frame about the back	16	speculation and conjecture since you had no
•	of the cab.	17	opportunity to inspect that system either
1	Q. Sitting here today, you can't testify on	18	before that this accident or after the
	that Kenworth whether the where the	19	accident?
	battery was located?	20	MR. PENICK: Object to the form of
•	A. That's correct.	21	the question.
	Q. No one on your behalf was able to inspect	22	A. Well, I hate to call it conjecture to

Dep	osition of Edward L. Robinson		June 22, 200
	Page 4	11	Page 43
1	Q. Well, let me ask you this. We don't know	1	Peterbilt. The fact that you don't find
2	sitting here today, June 22, 2006 - We do	2	skid marks behind a loaded eighteen-wheeler
3	not know what caused the Kenworth vehicle	3	does not mean that the driver does not
4	to leave I-85 and go into the median?	4	apply hard braking. It just means that for
5	A. I don't.	5	whatever reason you didn't have a locking
6	Q. And we don't have you don't have any	6	of the brakes; correct?
7	information, hard information from any	1 7	A. There can be a lot of reasons for failure
8	source as to what caused that, do you?	8	to lock the brake. It can be improperly
ğ	A. That's correct.	9	adjusted brakes. It can be failure to
10	Q. We don't know whether there was a	10	apply maximum brakes. It could be that you
11	mechanical failure or a defect on the	11	had ABS, which you wouldn't have on these
12	Kenworth tractor or trailer that caused	12	trucks, and in which case you normally get
13	that, do we?	13	skip skids or faint skip skids. But most
14	A. That's correct. We weren't able to inspect	14	commonly once you apply brakes hard,
15	that.	15	emergency braking, hard maximum braking, a
16	Q. And we don't know if at any time before	16	vehicle has to have time for the wheels to
17	that vehicle the Kenworth vehicle left	17	slow down and lock up and then the contact
18	the pavement I-85 pavement, we don't	18	patch of the rubber and the pavement to get
19			hot enough to start leaving visible traces
	know whether Mr. Morris applied any brakes? A. I don't know that.	20	of rubber. So, normally, vehicles will
20		21	lose eight or ten percent of their speed
21	Q. All right. And the Does the absence of	22	before the skid marks start after emergency
22	any And I'm talking about the Kenworth	23	
23	now. Does the absence of any tire markings	23	brake application.
	Page 42	2	Page 44
1	or what the jury may refer to as skid marks	1	Q. How many seconds are we talking about does
2	on I-85 tell you that Mr. Morris at no time	- 2	it take for the And I'm just talking
3	applied his brakes before leaving I-85?	3	about after the driver has realized that
4	A. No.	4	there's a need for what you were calling
5	Q. So he could apply his brakes, hard braking	5	hard braking. How many seconds does it
6	without locking his brakes and without	6	then take for that message to get to his
7	leaving skid marks?	7	foot, to get to the brake pedal, to get
8	A. It could be done.	8	into the system and to, as you've put it,
9	Q. And that same that same thing is true of	9	eventually cause the tires to heat up
10	the Peterbilt	10	enough to cause a mark?
11	MR. PENICK: Let me Let me	11	A. Well, that's a complex question, but let me
12	object to the question,	12	go back to the start. You're asking first
13	because I'm not so sure. Are	13	about perception-reaction.
14	you talking about skid marks	14	Q. No. No.
15	on the pavement or	15	A. Yes, you were. You said from when the
15 16	MR. BROUGHTON: Yes.	16	driver sees the object in the road.
10 17	MR. PENICK: skid marks within	17	Q. No. I'm past that.
	the median? If he went off	18	A. All right.
8		1	
9	the median, you must be	19	Q. And what I'm doing is — He's made the
20	talking about skid marks	20	decision that he's going to have to apply
21	MR. BROUGHTON: Mr. Robinson knows	21	some hard braking.
22	what I'm talking about.	22	A. Uh-huh (positive response).
:3	Q. And the same thing is true of the	23	Q. He's already perceived. He's already

Page 45 Page 47 Seems like I punched that through on a 1 started his reaction. And what Im saying 1 2 2 calculator and it turns out to be 60 or 70 is right now -- All I'm asking you right now is from the time he starts his 3 feet, another 20 feet for the delay. So 3 4 application of hard braking on the pedal to 4 we're talking about maybe 80 feet he would travel from the time he stomps the brake 5 the time it leaves or heats up the pavement 5 enough to start leaving a - what you would pedal until he starts leaving visible skid 6 6 7 call a tire mark or a skidmark, what's the 7 marks. Could be less than that; could be 8 8 range? I know it's not -- there's nothing more than that. 9 exact about that. 9 O. What do the books say -- And by books, what are the - what are the authoritative texts 10 10 A. Sure. or treatises that you would go to for 11 Q. What's the minimum and what's the maximum 11 information on perception-reaction times 12 12 13 for a driver? 13 A. Well, it's going to be dependent on the speed for time and also for distance. When 14 A. Well, right now I think the best 14 compilation of that is a program called you press the brake pedal on a truck, 15 15 Drive 3. It's in the library of that's really an air valve. 16 16 reconstruction programs called REC-TEC. Q. Right. 17 17 A. And this puts the air into the air lines on Q. Drive 3, is that --18 18 19 the truck, which may have something of the 19 A. That's one of the programs in --O. I know. But the three -- Is the three a order of a tenth of a second to get to the 20 20 drive wheels of the tractor, and they have 21 numeral three or a roman numeral three 21 two-tenths or a three-tenths of a second 22 22 23 23 delay to get to the trailer wheels. And it No. Just number three. Page 48 Q. Okay. Drive 3, is that -depends on the plumbing and the length of 1 1 A. That was written by Jeff Muttart, who's the lines and so on, what's their 2 2 probably now the best known and best 3 3 diameter. qualified in human factors reconstruction. 4 So the full truck brake system comes on 4 in parts. You might say it takes a couple Q. M-U-T --5 5 A. M-U-T-T-A-R-T, I believe. He's now working 6 6 tenths of a second for you to have full 7 braking. If he's going 70 miles an hour, 7 on his Ph.D. in -- I'm not sure what department -- psychology, criminal 8 as I believe your driver testified, which 8 psychology or -- Anyway, it's on human 9 is a little over 100 feet per second, then 9 factors. And I believe that it's at the 10 he would travel 20 feet or 30 feet during 10 University of Massachusetts. that time. 11 11 12 O. How do I -- Do I access that on the Now, if it takes another ten percent 12 speed loss to get the wheels to sloughing Internet? 13 13 off enough rubber to be visible, then he A. He does have an address, but I don't know 14 14 it right off. I'm sure I have it. would have dropped from 70 to 63. So 15 15 Q. Well, all I'm looking for is Drive 3. you're looking at an average speed of 16 16 somewhere around 66 miles per hour, which A. Oh. That, you can get from the REC-TEC 17 17 company. would be in the ballpark of 90 feet per 18 18 Q. W-R-E-C-K? second. Well, that would be easiest to do 19 19 with a kinematic equation to say two times 20 A. No. It's R-E-C, dash, T-E-C. And I think 20 that's just REC-TEC dot com. They'll et 21 the deceleration times the distance equals 21 22 the difference in the square of the initial 22 you download an examination copy of it. Their entire program is a fewthousand 23 23 and final speeds. And I think that --

		Page 49	,	Page 51
.)	1	dollars. In fact, I just talked to George	1	driver.
ı	2	Bonnett this morning, and he was telling me	2	Q. Do you Are you familiar with or have you
· · · · · · · · · · · · · · · · · · ·	3	about some new parts he put in the	3	ever seen any studies of
i	4	program. He's the author of that program.	4	perception-reaction times of reasonable
	5	Q. You're not a human factors expert?	5	truckdrivers faced with darkness and
-	6	A. I have some experience with human factors,	6	another overturned vehicle like the
-}	7	but that's not my main area of expertise.	17	Kenworth in this case where nothing but the
	8	I refer to the literature.	8	underside of the vehicle is facing that
}	9	Q. You're not offering yourself as a human	9	oncoming driver?
	10	factors expert	10	A. I have not duplicated this. No, I don't
	11	A. No.	11	have an example that duplicates this.
	12	Q. — in the case?	12	O. Wouldn't it be fair to say that whether
	13	A. No. But I'm saying that I know what the	13	the whether any of the lights on that
	14	literature says about perception-reaction.	14	Kenworth were still operable after the
	15	Q. Right. But you're not offering any	15	rollover or not that that would be this
	16	opinions as a human factors expert in this	16	would fit in the very complex area for
	17	case?	17	perception-reaction times?
	18	A. No. No.	18	A. You're going to have to define for me that
	19	Q. The Drive 3, does Is the information on	19	questionable phrase, would it be fair to
	20	perception-reaction time similar in the	20	say. Do you mean is it correct, is it
	21	Drive 3 program to what is reported in the	21	approximately correct, is it
.	22	Northwestern accident reconstruction	22	O. Wouldn't it be reasonable for the jury to
	23	manuals and books?	23	conclude in this case that with what
	23	manuals and books:		
		Page 50		Page 52
	1	A. It will vary, because what Drive 3	1	this the way this Kenworth was laying
-	2	attempted to do is to take the results of a	2	out there in the highway with nothing but
-	3	lot of experimental results and weight the	3	the underside of that truck facing oncoming
	4	various factors in. I'm not sure I've	4	traffic, that that would be what the
-	5	looked at the program. I have not run it	5	literature in the Drive 3 and the
	6	myself. But I know that it has a number of	6	Northwestern books would classify as a
	7	factors that go into the program, like	7	complex situation for a truckdriver to
	8	whether it's daylight or dark, whether the	8	assimilate, perceive and react to?
١	9	driver is fatigued or not. I don't know	9	A. I usually associate complex with a lot of
١	10	what all goes in. But it'll give you a	10	vehicles and a lot of different movement.
	11	range of values of perception-reaction time	11	I will say I think this would come in the
	12	that it operates from.	12	upper range of perception-reaction time,
	13	Q. What is the perception What is that	13	because the recognizing what's in front
	14	range of values for perception-reaction	14	of you is it's an unusual thing to see
	15	time?	15	in front of you.
ı	16	A. Like I said, I didn't run the Drive 3	16	Q. Nobody No driver No driver even of an
1	17	program on this. But the literature ranges	17	eighteen-wheeler is going to expect to see
	18	that I would use as the normal	18	another eighteen-wheeler rig overturned
	19	perception-reaction time most defaulted to	19	blocking the highway as this one as this
	20.	one and a half seconds. And I would say	20	Kenworth was at the time of this accident?
1	21	that's a lower range, because this is at	21	MR. PENICK: Object to the form of
	22	night. And I would think two seconds	22	the question. It requires
	23	should be an upper limit for a professional	23	speculation.
1 -				

				· · · · · · · · · · · · · · · · · · ·
-		Page 5'	7	Page 59
Į.	1	A. Actually that one would probably be	1	What you run into with speed is that the
	2	easier. When you do a speed calculation in	2	total stop distance tells us the square of
ş	3	parts like this, you start at the rest part	3	the speed. So if you go up ten percent in
1		_ · · · · · · · · · · · · · · · · · · ·		
ۇ	4	and work backwards. And to make an	4	speed, you're going up 20 percent in stop
ţ	5	estimate of a drag factor with the truck	5	distance. So if you take a look at
Ì	6	overturned would probably be more reliable	6	distance traveled and you put in a
. }	7	than with wheels in the mud So to find	7	reasonable drag factor and it indicates
	8	out where – what his speed was at the time	8	that you're not going at excessive speed,
	9	he overturned would probably be more	9	then that's about as good as you can do.
j	10	reliable than the speed at which he left	10	Q. Well, a legal speed for I-85 in your
	11	the road.	11	opinion or testimony and I guess
	12	Q. But that has not been done up to this	12.	Messerschmidt's opinion or testimony is the
in and in	13	point?	13	posted speed limit, 70 miles per hour or
	14	A. If it's been done, I didn't do it.	14	anything within, say, ten percent of that
1	15	Messerschmidt may have done it and not put	15	up to 77? That would be a legal Would
	16	it in the file. I don't know.	16	that be a legal speed?
	17	Q. On what occasions would you have somebody	1	A. I didn't say that.
	18	working on a case in litigation to do	18	Q. Well, do you How do you know that How
	19	calculations and not put them in a file?	19	do you know that the Morris the Kenworth
	20	A. I've done it myself. If I'm just looking	20	vehicle was traveling under 75 miles an
	21	at a rough calculation to determine whether	21	hour?
	22	something is a go or no go and determine	22	A. I didn't do the calculations, so all I can
	23	that and then move on and never put it in	23	say is that the indications were that there

	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the file. Q. Did Messerschmidt ever tell you what speed the vehicle — the Kenworth vehicle was going when it came back up onto I-85? A. I think the answer that I gave you on that a while ago was that he indicated to me that there wasn't evidence of excess speed and if he ever said what he thought the speed was, I don't recall it. Q. Excess speed in your vernacular, if I heard you earlier, means he wasn't going 90 miles an hour when he left I-85? MR. PENICK: Object to the form of the question. A. Well, that was a number that I picked out to say he wasn't doing that fast. No, I couldn't say that he wasn't going 71 or 72 or something like that. I don't know. But — Q. Or 75? A. I don't know. The thing that we run	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	was no evidence of excess speed. I can't Q. Well, you also said that it was your determination that Morris was Morris' vehicle was traveling at a legal speed. A. Which would mean 70 or below. That was the information that I was given from the preliminary calculations, and that's as far as I can go with it for now. I mean, I can sit down and do some more calculations if you'd like me to. But I haven'tdone them, and so I just Q. Did you do Did you do any calculations you or anyone on your behalf do any calculations to determine the speed of the Kenworth vehicle at the instant of rollover? A. No. Q. Do you Did you or anyone on your behalf do any calculations to determine how far
	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the file. Q. Did Messerschmidt ever tell you what speed the vehicle — the Kenworth vehicle was going when it came back up onto I-85? A. I think the answer that I gave you on that a while ago was that he indicated to me that there wasn't evidence of excess speed and if he ever said what he thought the speed was, I don't recall it. Q. Excess speed in your vernacular, if I heard you earlier, means he wasn't going 90 miles an hour when he left I-85? MR. PENICK: Object to the form of the question. A. Well, that was a number that I picked out to say he wasn't doing that fast. No, I couldn't say that he wasn't going 71 or 72 or something like that. I don't know. But — Q. Or 75? A. I don't know. The thing that we run into — I have not gone back and reviewed	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	was no evidence of excess speed. I can't Q. Well, you also said that it was your determination that Morris was Morris' vehicle was traveling at a legal speed. A. Which would mean 70 or below. That was the information that I was given from the preliminary calculations, and that's as far as I can go with it for now. I mean, I can sit down and do some more calculations if you'd like me to. But I haven'tdone them, and so I just Q. Did you do Did you do any calculations you or anyone on your behalf do any calculations to determine the speed of the Kenworth vehicle at the instant of rollover? A. No. Q. Do you Did you or anyone on your behalf do any calculations to determine how far the Kenworth tractor or trailer moved or

Page 61 Page 63 slide on the site map. I'm not aware at A. Right. 1 1 2 this point that that's been done. And, Q. And that -- And I know you're not a law 2 3 again, there may be site photos that would 3 enforcement officer, but that would 4 give us information on that. I don't know constitute what you earlier characterized 4 5 sitting here today. 5 as a legal speed? 6 Q. Sitting here today you cannot state how far 6 A. Yes. the Kenworth vehicle, either the tractor or 7 7 Q. You don't have any -- Do you have any evidence whatsoever to support any opinion 8 the trailer, slid on -- after the rollover 8 that the Peterbilt was traveling in excess 9 to its final rest --9 10 A. That's --10 of 70 miles per hour? Q. - before impact with the Peterbilt? 11 11 A. No. 12 A. Yes. That's what I just said. 12 Q. Have you as part of your work had an Q. That's correct? opportunity to review the affidavits filed 13 13 by -- that we filed by Mr. Thompson and 14 A. Yeah. 14 Mr. Tidwell? 15 Q. One comment I think you made - And I don't 15 16 know if this is -- I can't remember exactly 16 A. I believe I saw Mr. Johnson's yesterday. which report it's in, but the comment was I'm not sure I saw Mr. Tidwell's. I guess 17 17 made, I think, by you in a report -- in one I believe I did. I think he's the one that 18 18 of your reports that you and your -- and 19 19 said 65 to 70. Mr., I guess -- Was there anybody involved 20 20 Q. Do you have -besides Messerschmidt or Johnson? A. Mr. Thompson said 70. 21 21 Q. Do you have any information or was there A. No. 22 22 anything stated in either one of those 23 Q. And the report, I think, was made that 23 Page 64 Page 62 neither you nor anyone on your behalf could affidavits that you disagree with or have 1 1 2 determine the precise location of the 2 any physical evidence to prove is incorrect 3 Kenworth relative to the roadway after the 3 or inconsistent? overturn and before the collision by the 4 4 A. The speeds? 5 5 Peterbilt. Is that correct? Q. Anything they stated in their affidavits. 6 6 A. I believe that's right. A. No. No. Q. All right. So -- And this may be saying MR. PENICK: Let me object to the 7 7 the same thing. You do not know the exact form of the question. The 8 8 location sitting here today of the Kenworth question is too broad for him 9 9 to respond to anything he said 10 vehicle when it was impacted by the 10 Peterbilt? in the affidavit. I ask that 11 11 the question be more specific 12 A. That's correct. 12 as to what part of the 13 Q. Is it true -- And I heard you say this 13 earlier. And I'm assuming -- Which I know affidavit that you're asking 14 14 it's bad to do, but you will correct me if 15 15 about. I'm wrong. I'm assuming that the speed of 16 Q. Was there anything that you read in the 16 the Peterbilt -- Now, I'm going to the affidavit that you took exception to, in 17 17 Peterbilt that was driven by my client, either Mr. Thompson's or Mr. Tidwell's 18 18 19 Mr. Thompson. You're using his speed 19 affidavits? before any braking or slowing or impact at 20 20 MR. PENICK: Let me object to the 70 miles per hour based on what you form of the question until 21 21 understand to be his statement of his speed he's shown the affidavits. He 22 22 23 23 coming along I-85; correct? doesn't have a photographic

Page 67 Page 65 is outrunning their lights? memory to remember everything 1 1 A. For a stationary object in the highway in 2 2 that they said in their front of them, yes, I would say they are. 3 3 affidavits. Q. Is there anybody else that shares that 4 4 Q. Do you remember anything that you took 5 5 exception to? opinion? You read them yesterday? 6 A. Not based on the way they drive. But the 6 statements in the literature, Paul Olson's 7 7 A. Yeah. 8 book, for example, the Alabama statute all 8 No, I don't remember anything that I think is misstated or wrong. There may or say that you have your vehicle under 9 9 may not be. He could have been going more control so that you can avoid or stop for 10 10 than 70. He could have been going 65. But objects within the range of your lights. 11 11 I think Mr. Thompson himself said that he O. Have you ever testified in any other cases 12 12 was outrunning his lights, because he said 13 to the contrary? 13 A. I don't recall. I know that we talked I couldn't see the truck in time to stop. 14 14 earlier about a truck case with a man who And if you're driving too fast for the 15 15 was wearing dark clothing. But he stepped 16 range of your lights, regardless of what's 16 out in front of the truck as I recall, so in the road, you're outrunning your lights. 17 17 it wasn't a matter of something that was in Q. Are you an --18 18 the road and there as a stationary object. A. He made that statement. 19 19 Q. Are you aware of any studies or tests done 20 20 Q. Are you an expert on the range of by anyone with facts similar to this case headlights from a Peterbilt? 21 21 22 to determine the perception-reaction and 22 A. No. avoidability of an accident of this type? 23 23 O. Have you done any investigation, research Page 68 Page 66 A. I'm not familiar with specific pieces of in this case to determine the range of the 1 1 data in the literature. I'm sure that 2 2 headlights on the Peterbilt? Muttart's Drive 3 has some data with some 3 3 A. No. But he said he was outrunning them. 4 O. Where in his affidavit did he say -- You're 4 similarity to this. Since there are hundreds of data points in his research, if 5 talking about his statement that he could 5 not thousands -- I think it's in the 6 not see the truck in time to avoid the 6 thousands. No, I don't -- I don't know 7 7 collision. You've interpreted that to mean that somebody has put an upside down truck 8 he's saying he was, quote, outrunning his 8 or an overturned truck on a test strip and 9 lights? 9 tried to look for perception-reaction on an 10 10 A. Right. 11 overturned truck. Q. Have you done -- In this case, have you 11 Q. When were you first contacted in this case? done any work to determine at what distance 12 12 A. In September '04. September 22, '04. away from the Kenworth vehicle that vehicle 13 13 Q. By whom? 14 would have been visible to an oncoming 14 15 A. By Attorney Ed Robinson in Louisiana. 15 driver of --O. What was said during that initial contact? 16 16 A. No. A. I can't give you a verbatim. He -- We 17 O. -- a Peterbilt truck? 17 discussed back and forth. He gave me 18 A. No, not -- not for a driver of a Peterbilt 18 nor for this specific overturned truck general information. 19 19 Q. What information did he give you? 20 20 case. A. Well, that the name of the client/driver 21 Q. It's your opinion -- Is it your opinion 21 was Vernell Morris, that the defendant today that any person who fails to avoid 22 22 company was Florida Transformer, that his hitting an object in the highway at night 23 23

Deposition of Edward L. Robinson

Q. Well, no. But after your first 1 2

name was Edward A. Robinson, that it was a 2 plaintiff's civil case, the location of the

3 litigation would be in Macon County, the

- incident happened on I-85, the two pieces 4
- 5 of equipment involved were tractor-trailer 6 rigs and that the accident report named
- 7 Trooper Huntley as an investigating
- 8 officer, that Mr. Robinson's phone number
- 9 was this and his cell number was this and
- 10 his fax was the other and his second office 11 was another number. I can give you those
- 12 numbers if you want them. His mailing
- address, 600 North Foster Drive, Baton 13
- 14 Rouge, Louisiana 70806.
- Q. What did he ask you to do? 15
- A. To -- The most specific assignment, he just 16 17 asked me to look at the case and get back
- 18 with him and see what -- what could we find 19 out.
- 20 Q. What did you do next?
- A. Well, the next thing that we did that was 21 22 billable time -- I know I probably shuffled 23
 - some things around looking up some material

- conversation with Robinson, then you -somebody --
- 4 A. The site inspect -- The vehicle inspection was October 7, '04. 5
- 6 Q. That's the vehicle inspection?
- 7 A. Right.
 - Q. That's not the site inspection?
- A. Right. 9
- 10 Q. All right. And after the vehicle 11 inspection of October 7, '04, your next
- 12 recorded entry is a phone conversation on
- 13 February 4, '05?
- 14 A. Plus obtaining site photos from 15
 - Photographic Services of Alabama DOT.
- 16 Actually, we got proof sheets to pick the photos we wanted. 17
 - Q. Those are expensive, aren't they?
- A. Yeah. 19
- 20 Q. The February 4th conversation with
 - Mr. Robinson, what was the substance of
- 22 that conversation?
- 23 A. I don't take notes on the phone

- like -- Well, we told him what we needed in 1
- 2 terms of materials and waited on accident 3 reports and so forth. Made arrangements
- 4 for the mapping team to go down and map the
 - site, locate the truck and find out when we
- 6 could go see it. 7
- Q. Kenworth?

- 8 A. Mr. Morris' truck, the remains of it. And
- 9 that was the first thing that -- The first
- billable time entry is the one I told you 10 11 about before is on October 7, '04, that
- 12 Mr. Messerschmidt went down to Kerns Truck
- 13 Parts and examined the remains of the
- 14 tractor, the cab of the tractor. The next
- thing was a phone conference with Attorney 15
- Robinson. We --16
- Q. When was that? This was your second? 17
- A. Yeah. This was February 4, '05. We --18
- Q. Okay. Hold on. Hold on. Let me slow you 19 20 down just a second there. You had -- After
- 21 the September 22, '04 conversation, the
- 22 next recorded entry is October the what?
- 23 A. February 4, '05.

- conversations unless there's specific 1
 - 2 things he wants. And in this case, he 3 requests copies of the -- requested copies
 - 4 of the site photos. And we agreed to get
 - them.
 - 6 Q. All right. Up to February 4, 2005, neither 7 you nor anyone on your behalf had been to
 - 8 the site?
 - 9 A. That's correct.
 - 10 Q. When was the first site visit by any of 11 your people?
 - 12 A. On February 23, '05, the photographs that
 - we furnished you were taken and the man of 13
 - 14 the site was made or the data was taken 15 with a total station.
 - Q. The only -- You did not attend the site inspection?
 - 17 18 A. Neither the site nor the truck cab 19 inspection.
- 20 Q. The truck cab inspection was attended by 21 Messerschmidt and Johnson?
- 22 A. No. Just Messerschmidt. And there was 23 someone there named Don Glenn. And I don't

Page 85 Page 87 necessarily tell you that. He could tell 1 helt. 1 2 2 you what the -- what injuries were Q. Are you aware of any studies that have been 3 associated with the fatality. But I don't done to determine injuries received from 3 think you've got the kinds of forces 4 seat belts? 4 5 A. No. 5 involved with the rollover by a factor of 6 ten or 100 to cause the kind of injuries 6 Q. You're not testifying today either way as 7 to whether or not the fatal injuries to 7 that you can get from these impacts. 8 Mr. Morris were caused by the seat belt? 8 Q. But that -- that -- And I understand -- I 9 A. I don't know. It's certainly possible in 9 understand you want to give your personal 10 the kind of impact that he got that just 10 opinion, observation that you think it was 11 the inertia forces and the weight of his 11 more like -- that you think it was more 12 body could have done significant damage 12 likely in your personal opinion that the like breaking bones. impact forces or that injuries received 13 13 14 Q. Have you ever worked in a case for either 14 after the impact with the Peterbilt could side where there was a fatality in a 15 15 have caused Mr. Morris' death. But what rollover? 16 16 I'm getting at is you don't have a professional opinion because you're not a 17 A. I'm sure I have. I can't put my finger on 17 18 one right now. But, yeah, it's not medical -- you're not a medical expert, 18 19 uncommon for fatalities in rollovers with 19 you're not a biomechanical expert, you haven't determined what specific injuries 20 20 were caused by what specific objects or 21 Q. Well, you're not ruling out the fact that 21 22 Mr. Morris could have been fatally injured 22 forces in this case, so you can't give an 23 during the rollover in this case? 23 opinion to any degree of reasonable medical Page 88 Page 86 1 A. In my own mind, yes. Because the nature of 1 certainty as to what caused Mr. Morris' the injuries is not such that would be on 2 2 death in this case? 3 the left side of his body. I mean, he 3 A. No, I can't give a medical opinion or a 4 would have bilateral injuries. And that's 4 biomedical (sic) engineering opinion. I'm 5 not going to happen when he -- from that 5 just basing it on experience looking at 6 6 other vehicle wrecks over the last 40 years rollover. Q. But you don't know what injuries caused his 7 7 as to what kind of forces won't cause what 8 death? kind of injuries. 8 9 9 Q. But you do agree that people have been A. I haven't -- All I've done is look at the fatally injured in rollover accidents? 10 autopsy report. I haven't tried to make 10 any determination beyond that. A. They have. 11 11 Q. And it would be fair to say that Mr. Morris 12 12 O. The next comment on Defendant's Exhibit 2 could have received fatal injuries in this 13 13 says no evidence the belt was slash 14 case during the rollover? 14 something? 15 A. I don't believe that. Because he's belted 15 A. Was not worn. 16 in, and I don't believe he would have 16 Q. No evidence the belt was not worn except 17 ejected from the simple rollover with his the belt locked fully. 17 A. Uh-huh (positive response). In extended 18 seat belt on. 18 position. 19 O. We don't know - You don't know - Because 19 20 you're not a medical expert, you don't know 20 Q. What does that mean? whether or not he received fatal injuries A. Well, belt locked fully extended. 21 21 before ejection, do you? 22 22 Q. Belt locked fully extended. 23 A. Well, I don't think a medical expert could 23 A. Right.

Dep	osition of Edward L. Robinson		June 22, 200
	Page 11	3	Page 115
1	in trailers, and I've seen evidence to	1	before.
1 2	indicate that some materials are weakened	2	Q. So you've never seen a pucker from this
3	by extended exposure to sunlight and the	3	kind of an accident before?
4	extensive strength deteriorates. It's	4.	A. That's right.
5	pretty rare to see a broken seat belt. In	5	Q. Did anyone from your office ever actually
6	fact, it's not common to see them	6	weigh the any portion of the Kenworth
7	stretched. The forces that we see in a	7	vehicle?
8	lot of accidents in the 30, 40, 50 mile an	8	A. No.
)	hour range, there's not enough forces to	9	Q. On Defendant's Exhibit 2, there's some
10	stretch seat belts	10	up in the top right-hand corner, there is a
111	Q. You've done I'm sorry. Go ahead.	111	statement, chassis weighed 16,290. What is
12	A in automobiles that I've seen more of	12	that measurement in?
13	than trucks.	13	A. It would be in pounds. And I don't know if
14	Q. You've not done any testing on this belt to	14	that's a gross vehicle weight rating or if
15	determine what forces on this belt and	15	that's an actual cab weight. That's about
16	you know, in its condition at about the	16	right for the tractor weight of that sort
17	time of this accident would cause a pucker?	17	of vehicle.
18	A. No.	18	Q. What does
19	Q. You've not done any testing or examination	19	A. Usually
20	of this belt to see if there were any	20	Q. I'm sorry.
21	manufactured defects or glitches in it that	21	A. Usually, they stamp gross vehicle weight
22	could have caused stretching or puckering	22	rating on these things. They don't give
23	with less force than you're usually	23	you the actual weight. Model number, I
20	Will loss lord and you're downly		, , , , , , , , , , , , , , , , , , , ,
-	Page 114		Page 116
1	familiar with?	1	don't know what that means. Just model
2	A. I haven't looked for it, because I've never	2	T600 on a label that's on the remaining
3	seen a pucker like that that wasn't caused	3	part of the cab. Chassis number, some
4	by an excessive force on the belt from	4	number on a label that's stamped there.
5	either a wreck or from laboratory-induced	5	There's your Your gross vehicle weight
6	stretching.	6	rating is 48,000 pounds.
7	Q. How many puckers have you seen from wrecks,	7	Q. For what?
8	from actual wrecks?	8	A. It has to be the cab the tractor because
9	A. Probably a few dozen.	9	the trailer is not there.
10	Q. How many puckers have you seen from	10	Q. Did you or Messerschmidt or Johnson ever
11	eighteen-wheeler accidents?	11	get any size, length or weight information
12	A. I can't separate in my own mind what would	12	on the trailer that the Kenworth was
13	be cars and what would be	13	pulling?
14	eighteen-wheelers.	14	A. Weight information. The accident report
15	Q. Most of your experience has been cars?	15	said that he had 22 containers of titanium
16.	A. There are more cars than trucks, but over	16	dioxide that weighed 2,000 pounds each, so
17	40 years there have been a lot of trucks.	17	he had a 44,000 pound load. Other than
18	Q. How many times have you seen a pucker in a	18	that, I Usual trailer weight with
19	seat belt after an accident of this type	19	tractor weight is going to run between 25
20	where you had an impact due to rollover and	20	and 30,000 pounds. So he was somewhere
21	then a subsequent impact from another	21	from, say, 77,000 pounds down to maybe 72,
22	vehicle?	22	maybe another thousand or so down in gross
23	A. I've never seen that kind of accident	23	weight of the whole vehicle.

1 Q. Did you use any information -- any weight, length, size or measurements of the

2 3 Kenworth tractor or trailer in any

calculations to support any of your

5 opinions? 6

4

7

8

A. Qualitatively just to understand that the other truck was also loaded and that the two trucks involved would have comparable

9 weights as opposed to a car and a truck 10 where your weight disparity is 15 or 20 to

11 one.

12 Q. But you didn't do any -- you didn't do any 13 speed calculations in the case?

14 A. That's right.

O. And Messerschmidt didn't do any speed 15 calculations? 16

17 A. Well, none that was written down, no.

18 Q. What does -- On Defendant's Exhibit 3, which is dated 10/7/04 at the top -- And 19 20 this is part of Messerschmidt's notes at

21 the time of his inspection; right?

22 A. Yes.

23 Q. At the top it says -- the first line talks

knocked forward and up? 1

A. I don't know that.

Q. Would that be of any use in your analysis? 3

A. Not that I can think of at this point.

5 Q. Do we know if the passenger's side -- Would 6 there have been -- Was there a lap

belt/shoulder harness seat belt on the 7

8 passenger's side? 9

A. I don't know. I would assume there would be because it's required.

Q. Do you know if there were any stretch, 11 scrape or pucker marks in the passenger's 12 side seat belt? 13

14 A. I would be very surprised if there was, 15 because my understanding was there wasn't a passenger in the vehicle. 16

Q. But y'all didn't -- you didn't inspect 17 18 that?

19 A. They probably -- He probably took a look at it, but there's no photographs, no records 20 21 of it.

O. No information in here as to whether or not the passenger's side seat belt had any

Page 118

1 about Don Glenn. I understand that. And 2

the inspection was at Kerns Truck Stop or

3 Truck Parts; right?

4 A. Right.

5 O. And then it says, motor gone. Do you see 6

that?

7 A. Right.

O. Frame gone and cut up; right? 8

9 A. Right.

10 Q. Only cab left to inspect; right?

11 A. Right.

Q. And we've already discussed that. The next 12

13 thing says, P slash S door and seat removed by Bill of KTP. What does that mean? 14

15 A. Passenger's side door and seat was removed 16 by Bill of Kerns Truck Parts.

Q. That's talking about the passenger's side 17 18 seat was removed?

19 A. Right.

20 Q. Do we know if there was any damage to the 21 passenger's side seat in the Kenworth?

22 A. None was mentioned. I don't know.

Q. Do we know if the passenger's side seat was 23

pucker or stretch?

A. I think he would have certainly noted that, because that would have indicated some loading on that belt. And that would have given a very big question as to who was in the truck with him and where did they go.

Q. You don't know if he even inspected the passenger's side seat belt?

A. You're asking me things like do I know did he brush his teeth before he left that morning. If he had seen something that was noteworthy on that seat belt, he would have recorded it or at least reported it verbally to me, and nothing was ever said about that. When you look at a car or when you inspect a vehicle, you look at many things that you don't record, things that are unremarkable. You just don't record them. You record the unusual data or the things that may be useful in potential calculations such as weights or things like that.

Q. Do you know when the chassis and motor were

Page 133 Page 135 1 understand. I know we spent some time on his testimony. 1 2 the seat belt and the buckle and the reel 2 Q. And you've done no calculation -- You've 3 or the locking mechanism and the fabric. 3 done no calculation -- calculations to 4 Is there anything else about the driver's 4 determine the Delta-V or impact speed of 5 seat belt system on this Kenworth truck 5 the Peterbilt? 6 other than what we've already discussed 6 A. There's no way from the damage pattern to 7 that is evidence to you that the seat belt 7 do it. There's no such things as stiffness 8 was or was not in use during this accident 8 coefficients for crashes on trucks. The 9 sequence? 9 only calculation that I could do on that is 10 A. Any evidence on the truck? 10 to know that in the vicinity of ten percent Q. No. On the seat belt or the -of speed is lost between emergency brake 11 11 12 A. Oh, the seat belt. 12 application and the start of brake skid Q. -- seat belt mechanism or the buckle or the 13 13 marks, visible skid marks. And assuming 14 reel that we haven't already discussed that 14 that he did maximum braking and there were 15 was -- supports evidence that it -- that 15 no skid marks left, then I would assume 16 this particular belt was either in use or 16 that he wouldn't be below the lower 60s at 17 not in use at the time of the accident? 17 impact. 18 A. I can't remember anything else. It seems 18 Q. You never saw any -- or you did not --19 Neither you nor Messerschmidt nor Johnson to me we covered everything several times. 19 20 Q. And where -- Do you have an understanding 20 inspected the chassis of the Kenworth 21 as to where Mr. Morris was when everything tractor or the trailer that it was pulling; 21 22 came to a rest after -- you know, after the 22 correct? 23 whole entire accident sequence? 23 A. Yeah. A number of times we've said that Page 134 Page 136 1 A. I don't right now. I suppose somebody all was left was the cab. 1 2 indicated that somewhere along the line, 2 Q. You don't -- Sitting here today, you don't 3 but I don't know. 3 have an opinion or any information as to 4 Q. Was he still in the driver's seat of the 4 the points of impact between the Peterbilt 5 cab? 5 and the Kenworth? 6 A. My recollection is he was not. 6 A. All we know is somewhere in the bottom of Q. Did you or Messerschmidt or Johnson form 7 7 the cab. any kind of conclusions, opinions or 8 8 Q. Why do you know that? observations as to why he was not or how he 9 9 A. Because the floorboard is buckled up. 10 got from the seat to where he was when 10 Q. Of what floorboard? 11 everything came to rest? 11 A. Of the Kenworth tractor. 12 A. Got hit about 70 miles an hour with a Q. The part of the cab that Messerschmidt 12 13 40-ton truck. 13 inspected --14 Q. Sitting here today, you don't know what the A. Yes. 14 15 impact speed of the Peterbilt was; correct? Q. - shows some -- the floorboard? What part 15 16 A. Not to within two or three miles an hour. 16 of the floorboard? 17 no. I'm just using the testimonyof your 17 A. I didn't -- All I can do is see the same 18 truckdriver. things that are in the pictures. I didn't 18 Q. The maximum speed of the impact would have 19 19 see the cab itself, but ... 20 been 70 miles per hour if there was no 20 Q. Were there any measurements taken as --21 braking or deceleration of any type prior 21 from back to forth -- back to front or side 22 to impact? 22 to side to -- as to where that buckling was 23 A. Right. Well, that's what I've assumed from 23 in the floorboard?

What is In Defendant's Exhibit 5, what is this calculation that we're looking at? A. There is the calculation of stopping distances for different drag factors for a vehicle going 70 miles an hour. And it's
15 16 17 18 19	to you about Panther or anybody associated with their insurance carrier? A. No. Q. Do you know who paid the for the property damage to the Kenworth and the	15 16 17 18 19	 A. I haven't considered it. Q. What is In Defendant's Exhibit 5, what is this calculation that we're looking at? A. There is the calculation of stopping distances for different drag factors for a vehicle going 70 miles an hour. And it's calculated Well, the first thing I did
15 16 17 18 19 20	to you about Panther or anybody associated with their insurance carrier? A. No. Q. Do you know who paid the for the property damage to the Kenworth and the Kenworth trailer?	15 16 17 18 19 20	 A. I haven't considered it. Q. What is In Defendant's Exhibit 5, what is this calculation that we're looking at? A. There is the calculation of stopping distances for different drag factors for a vehicle going 70 miles an hour. And it's calculated Well, the first thing I did was just start off with conservation of
15 · 16 · 17 · 18 · 19 · 20 · 21	to you about Panther or anybody associated with their insurance carrier? A. No. Q. Do you know who paid the for the property damage to the Kenworth and the Kenworth trailer? A. I don't know.	15 16 17 18 19 20 21	 A. I haven't considered it. Q. What is In Defendant's Exhibit 5, what is this calculation that we're looking at? A. There is the calculation of stopping distances for different drag factors for a vehicle going 70 miles an hour. And it's calculated Well, the first thing I did

Page 141 Page 143 equations relating to speed distance, 1 that equation on both sides. And then I 1 2 coefficient of friction and gravitational just solve for V for final speed. Well, 2 3 constant and looked at the stopping that's not what I want. I really want 3 4 distance for different drag factors; .4, .5 4 stopping distance, so I solve for the stopping distance. And that turns out to 5 and .6. 5 6 The trucks that I have done 6 be V squared over 2 G mu. Where mu is the 7 instrumented skid tests in that had 7 drag factor or coefficient of friction of 8 8 properly adjusted brakes were usually about friction for locked tires. 9 .6 for their drag factor. And using that 9 So the 70 miles an hour -- of course, 10 value, I made another calculation on the 10 that's to be converted to feet per seconds. following sheet. If we assume that the 102 and two-thirds feet per second divided 11 11 12 perception-reaction time of Mr. Thompson is 12 by two G times mu and then plug mu in as .4, .5 and .6 and get the stopping 13 two seconds in this instance and that his 13 distances from brake application to stop. 14 lights will illuminate something 350 feet 14 Q. And for the comparison here or for your 15 down the road on high beam, then that says 15 16 that from the time he can see it and 16 purposes, you chose the drag factor that perceive it and react that he's traveled gave you the shortest stopping distance? 17 17 205 feet or he has about a 144.7 feet more A. No, I didn't. I chose the drag factor that 18 18 19 to go before impact. I have measured personally in instrumented 19 20 So if we'd start him off at 70 miles an trucks in emergency brake application. 20 O. When did you measure the drag factor on 21 hour and decelerate him at .6 G for a 144 21 22 feet -- 144.7 feet, what's his final I-85 in the vicinity of this accident? 22 . 23 speed. And it turns out to be about 23.8, 23 A. I didn't. Page 144 Page 142 24 miles an hour. The damage to the O. You did not? 1 1 2 vehicle is to the -- to the Morrison (sic) 2 A. No. 3 vehicle is very much inconsistent with that 3 O. Did Messerschmidt or Johnson ever measure a 4 4 kind of collision speed. drag factor at the site of this acciden? 5 Q. On Defendant's Exhibit 5, this is stopping 5 A. No. 6 distance from what point to what point --6 Q. Do you know that the drag factors change 7 A. Brake application to stop. 7 depending upon the highway condition and 8 Q. -- and time? 8 the surface? 9 And with what weight? 9 A. Yes, sir. I've written an essay paper on 10 A. Doesn't matter about the weight. It's 10 it a few years ago. independent of the weight. O. What's the name of that paper? 11 11 Q. Why is that? 12 12 A. Well, let's see. What's the exact title? A. Because the frictional force is equal to 13 Let me see the CV there. 13 the weight times the coefficient of 14 14 Analysis of Accelerometer Data for Use 15 friction, and so the weight cancels out. 15 in Skid-Stop Calculations. And it's SAE If you look up in that top line, there's an paper number 949108. It was incorporated 16 16 17 equation that says the one half my squared, 17 in the book called Accident which is the initial kinetic energy, is Reconstruction: Technology and Animation 18 18 19 equal to mg mu X. Mg is the mass times the 19 IV. Q. What page are you on on that resume? I 20 gravitational constant which would be the 20 weight. So it's the weight times the want to make sure I'm --21 21 coefficient of friction times the distance 22 22 A. Page four. 23 to stop. Well, the mass cancels out of 23 Q. Page four. All right. Give it to me

Page 149 Page 151 1 Q. Is it your opinion that the load -- the Well, he's still going to hit the truck, 1 2 amount of load or the weight that the but he's going to be going slower when he 2 Peterbilt and trailer were hauling at the 3 3 hits the truck. If he brakes for 144.7 4 time of this accident has no effect on the 4 feet and he starts off braking at 70 miles 5 stopping distance? 5 an hour, then he's going to be going in the 6 A. If the brakes are properly adjusted and you 6 low 20s when he impacts. can get maximum braking, no, it wouldn't. 7 7 Q. By your calculations -- If I'm If the brakes are not fully adjusted, yes, understanding you correctly, by your 8 8 9 calculations in Defendant's Exhibit 5 and 9 Defendant's Exhibit 6 assuming optimum 10 Q. And if the -- if you used -- Well, let me 10 ask you this. Maybe I didn't understand conditions of braking efficiency and 11 11 it. How does the stopping distance perception-reaction, the Peterbilt is still 12 12 calculated on Defendant's Exhibit 5 fit 13 going to hit the Kenworth at 23 miles an 13 14 into the equation on Defendant's Exhibit 6? 14 hour? A. Well, I'm saying that -- It doesn't 15 15 A. Right. If he doesn't steer off the main 16 really. It just says that that stopping part of the road onto the shoulder. 16 distance is less than the -- less than the Q. Right. So there's no way to avoid --17 17 There's no way that Mr. Thompson could have 18 distance to impact the truck, that the 18 19 distance I've subtracted off over here is 19 avoided this collision? 20 the distance that you actually travel in 20 MR. PENICK: Object to the form of 21 his perception-reaction time with no 21 the question. braking for 205 feet. I'm just looking 22 22 Q. Correct? 23 here to see if we had wet, slick pavement 23 A. No. That's incorrect. One, at that speed Page 152 Page 150 and slick tires or very mild-adjusted he should have been able to steer off. 1 1 2 brakes and we had coefficient of friction And, two, if the coefficient -- If the 2 3 of .4. Even if he had put on his brakes at 3 braking efficiency is a little higher orhe 350 feet away, he couldn't have avoided the 4 reacts a little faster, he can still manage 4 5 collision. He could have only slowed 5 to stop in time to not hit the truck. 6 6 O. How's he going to do that? Show me -- Show down. 7 me your calculation where he avoids --If we had had a .5 and he can see 350 8 8 feet and he put on his brakes at 350 feet. where he's able to stop? he could have stopped. But he's got to 9 9 No. The one you've already done. have time to respond to perceive and to 10 10 A. Oh, it's not in there. react. And so really this -- this is Q. You haven't done a calculation? 11 11 12 independent of that. It's just that I'm 12 A. I told you I had done a number of seeing what are the stopping distances for 13 calculations and that this was one example 13 14 coefficient of friction. Over here I'm 14 of the calculations. And if you want me to do a calculation to see what would be 15 looking and saying, okay, if he can see 350 15 feet ahead of him and he sees the truck, 16 involved if he stops, I can do this. It's 16 17 then he's got to realize that that presents 17 not on this page right here. a hazard and move his foot from the Q. Have you done a calculation using -- What 18 18 19 accelerator to the brake and that takes him 19 would his speed be -- What would the speed at impact be if you used the .5 drag factor 20 two seconds, then he's traveled 144 feet. 20 on Defendant's Exhibit 5? 21 So he then has the remainder of -- I'm 21 22 sorry. He's traveled 205 feet. So that 22 A. Do you want me to calculate it? 23 leaves him another 144.7 feet for braking. 23 O. Please.

	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	all speculating. Q. You have no idea MR. PENICK: But you can't object to him speculating if the question is speculating. Q. Let me ask you this. Did you or Mr. Messerschmidt make any tests or examinations of the any of the bulbs in the headlights of the Peterbilt to determine if the high beams or the low beams were illuminated at the time of this accident? A. The headlights didn't survive according to the photographs I've seen of the Peterbilt. We did not examine the Peterbilt. Q. Did you or Mr. Messerschmidt ever examine the headlights or taillights or running lights on the Kenworth to determine if any of those lights were illuminated at any point? A. None of those lights were there at the	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 A. No. Q. Did you find You don't have any physical evidence to verify that any of the A. This would be the headliner bulbs, the Q. Interior bulbs A. Yeah. Q to the cab? A. Yeah. Q. So that doesn't have anything to do with anything that could have been seen by Mr. Thompson as he approached that vehicle? A. No. And I wouldn't expect those to be on at the time of the accident. They're interior bulbs. Q. You don't have any physical evidence to establish that any of the lights, headlights, taillights, running lights, were on the Kenworth tractor or trailer at after the rollover and at the time Mr. Thompson approached in his vehicle?

June 22, 2006

Page 173 Page 175 that they were on. Because unless the that's the case, whether any of those 1 1 lights would have been visible on the side 2 impact is very near the bulb, you don't get 2 3 3 of the Kenworth? hot set. 4 Q. So you don't have any evidence to --4 A. Yeah. If -- Those are measurement 5 A. I don't have any evidence. 5 distances I've done on a lot of trucks. And that's a typical eye height of a driver 6 Q. -- to prove any of those lights were on --6 in a cab of a truck, eighteen-wheeler. And 7 7 A. No. eight feet is a typical width or, I don't 8 Q. - at the time Mr. Thompson approached? 8 9 9 know, maybe they make some nine feet now. A. No. 10 Q. You don't have any physical evidence that 10 But eight or nine feet width of the trailer even had they been on -- had any of those with the lower end of the trailer down in 11 11 12 headlights, taillights, running lights on the median, it would have been below his 12 the Kenworth been on that they would have 13 13 eye height or the upper one at his eye been visible to Mr. Thompson approaching in 14 14 height. 15 that Peterbilt? 15 Q. And then you did a test or a study of an exemplar vehicle in this case? A. I don't have any physical evidence of it, 16 16 17 17 Q. You've never inspected the trailer that the 18 Q. The running lights -- We can agree, can't 18 we, that the running lights, if any, that Kenworth was pulling at the time of the 19 19 were illuminated by bulbs or light bulbs on 20 20 accident; right? the left side of the tractor or the trailer 21 21 A. I'm -- We've said that about 15 times. No, would have been down on the ground between sir, I did not inspect the trailer of the 22 22 Kenworth, the Peterbilt nor the Peterbilt 23 the ground and the tractor and trailer; 23 Page 176 Page 174 tractor nor anything except the remaining right? 1 1 A. Right. 2 cab of the Kenworth. 2 3 Q. Those would not have been visible to 3 O. Doesn't that limit your ability to give any opinions in this case, Mr. Robinson? 4 Mr. Thompson; correct? 4 A. If you -- You are asking me about could he 5 A. Not likely. 5 see it. I'm telling you that the geometry 6 6 Q. The -- Any running lights on the topside --I mean on the right side of the tractor and of his line of sight is that he could have 7 7 the trailer after it rolled over had they had a line of sight to those bulbs. No, if 8 8 he's looking somewhere else he wouldn't 9 been on would have been -- would not have 9 10 have seen those bulbs. If he's been visible by Mr. Thompson as he 10 inattentive, he wouldn't have seen those 11 approached? They would have been vertical; 11 12 12 correct? bulbs. 13 A. Well, they would be up eight feet off the 13 Q. Doesn't the fact that you have not had an ground. For a trailer in the usual opportunity to inspect the Kenworth 14 14 tractor, chassis, trailer or the Peterbilt, driver's eye height in a cab is about nine 15 15 and a half feet. So he would have been anything on the Peterbilt -- doesn't that 16 16 severely hamper your ability to render any on -- slightly above eye level of the 17 17 18 trailer marker lights. And the trailer end 18 opinions in this case? that's lower in the median, he would have A. It would be more favorable if I could have 19 19 20 been several -- two or three feet higher. 20 seen them, yes. O. I mean, this is not your typical Those lights he probably could have seen. 21 21 investigation and assimilation of evidence Q. Have you done -- Have you done any tests or 22 22 studies with exemplars to determine whether 23 to support any expert opinions in the cases 23

June 22, 2006

	Page 17	7	Page 179
1	you normally handle, is it?	1.1	can't. No, I can't.
2	MR. PENICK: Object to the form of	2	Q. Did you ever talk with or interview
3	the question.	3	directly or by telephone and by you I'm
4	A. We've had remains of vehicles to examine on	1	including Mr. Messerschmidt and
5	a number of occasions before, yeah. We	5	Mr. Johnson either of the troopers
6	don't have the whole vehicles. Many times	6	involved in investigating this accident?
7.	we don't have the adverse vehicle.		
4		7	A. I'm not aware that they did. I did not.
8	Q. You don't really believe that any of these	8	Q. Did you ever question or inquire about any
9	opinions you've written down in this case	9	of the information reported on the Alabama
10	are to any degree of reasonable accident	10	Uniform Accident Report that you reviewed
11	reconstruction certainty, do you?	11	at part of your work in this case?
12	A. Yes, I do. I wouldn't have submitted if I	12	A. I don't recall asking any questions about
13	hadn't.	13	it, no.
14	Q. Well, you don't believe that you've done a	14	Q. Was there anything in the Alabama Uniform
15	complete investigation and examination of	15	Accident Report that you found to be
16	the vehicles that would be required or	16	inaccurate?
17	any of the site or the evidence that would	17	A. I don't recall anything.
18	normally be required to render any opinions	18	Q. You've got in your book as something you
19	of that type, do you?	19	relied on your review of the that
20	MR. PENICK: Object to the form of	20	accident report in this case, didn't you?
21	the question.	21	A. Yeah. There's no Where it happened.
22	A. I'm sorry.	22	Q. All I would like to do All I would like
23	MR. PENICK: It assumes facts.	23	to do And this is the copy that we have
		•	• •
	Page 178		Page 180
1	A. I'm sorry. I disagree with that. We have	1	and I'm willing to use our copy. Excuse me
2	examined all that was available to us to	2	for this. I'm going mark this as
3	examine. I did not go to the site. I did	3	Exhibit
4	not see the vehicle. It was our intention	4	MR. BROUGHTON: And, Henry, if
5	that Mr. Messerschmidt would do the	5	I've got which I know I
6	testimony, so he went to the site and the	6	do. I'm going to ask the
7	vehicle.	7	court reporter to take off any
8	Q. So it's your normal practice even if you	8	highlighting on my copy. If
9	don't have the opportunity to do the	9	you've got a clean copy, we
10	investigation required to support opinions	10	can use that. I mean, there
11	to give opinions anyway?	11	are just a couple of little
12	A. Not at all. I think that I can support the	12	highlight marks. But I want
13	opinions that I've given. And I'm agreeing	13	to mark this as Defendant's
14	that there are some things that we can't	14	Exhibit 8: We can use If
15	say. We can't say anything about the	15	you've got a clean copy, could
16			
	Peterbilt headlights. They're gone. But I	16	we use your clean copy and get
17	would assume that his lights were on when	17	you a copy back?
8	he was going down the road or he would have	18	MR. PENICK: There's a copy in the
19	stopped driving.	19	stack there.
	Q. But you can't say whether any of the lights	20	MR. BROUGHTON: Oh, let's use
21	were on that Kenworth, the tractor or the	21	that. There you go.
2	trailer after the rollover, can you?	22	MR. BRITTAIN: Just, you know,
.3	A. I don't have the bulbs to Well, no, I	23	make a note that this is in

:		Page 20	1	Page 203
many transfer has promption to the contract of	1 2 3 4 5 6 7 8	locate or ever inspect the switch the dashboard switches in the Kenworth to determine what position they were in at the time of this accident? A. The discussion I recall on that was that that wasn't given any credibility, because the cab had been handled and a lot of people had been around the cab. The switch	1 2 3 4 5 6 7 8	 marks in the median that Messerschmidt and Johnson found on their site inspection with any of the tires or parts of the Kenworth vehicle? A. You mean specifically which tire made which mark? Q. Or which part of the vehicle made which mark.
Freeze, Freeze	9 10 11 12 13 14 15	 may have been turned from off to on or off to on. And I don't recall what position if he recorded it that Messerschmidt said that the switch was in. Q. Do you know what kind of switch it was? A. A truck light switch. Q. I'm not familiar with Kenworth's, but I 	9 10 11 12 13 14 15	 A. I don't recall that that was done. Q. And, in fact, in reality you don't know – you don't know at what point that the trailer started rolling or at what point the tractor Kenworth tractor started rolling over to its left side? A. No.
	16 17 18 19 20 21 22 23	know I've had vehicle car vehicles sometimes where the light is on the what usually is a windshield wiper arm. Sometimes you have to pull the lights on and off. Sometimes they're automatic. Sometimes they are switches where you have to turn the lights on and off. Do you have any idea which switch was involved in this	16 17 18 19 20 21 22 23	 Q. And you don't know how far the Kenworth tractor chassis or trailer moved after the impact with the from the Peterbilt? A. No. Q. Did the Were there any markings on the pavement when you know, from any part of this accident sequence when Messerschmidt and Johnson made their site inspection in
	1 2 3 4 5 6 7	case? A. No, I don't. Q. And we don't know whether at the time of the that the Peterbilt was approaching that Kenworth whether that whether the light switch was on or off? A. No.	1 2 3 4 5 6 7	Page 204 late February of '05? A. That's the map. Q. All right. The map Yeah. The map you've produced we've got I'm going to We've got two copies of that. The first Is this the one that you just produced?
	8 9 10 11 12 13 14 15 16 17	 Q. And nobody was able to test the Kenworth tractor cab after this accident to determine if any of those electrical systems were still operative after the impact? A. Well, not after the impact. They were destroyed in the impact. And, again, I think we've been over that two or three times, that nobody examined the electrical system. Q. Don't know whether it was damaged during 	8 9 10 11 12 13 14 15 16 17 18	 A. Yes, it is. Q. And that's exactly like And that's the final map that you used to support any of your opinions in this case? A. Yes. Q. And we're going to mark that as Defendant's Exhibit 9. (Defendant's Exhibit 9 was marked for identification.) (Off-the-Record discussion.) Q. Do you know when this particular version of
	19 20 21 22 23	the rollover? A. That's the same answer. Q. The Do Did Messerschmidt or you or Johnson I guess this could be any one of the three of you ever match any of the	19 20 21 22 23	this map was completed? A. Well, the Q. The date? A. The site map was done at the date I told you before, which was February 23, '05.

Page 205 Page 207 When it was actually rendered onto paper A. I don't know. 1 1 2 was a couple of days later. As far as I Q. Who prepared this? 2 A. Gary Johnson. 3 know, it was the next day. When this 3 Q. And only Gary? 4 specific copy was made, I don't know. 4 5 There's no way to tell this. 5 A. Yes. 6 Q. Well, there were -- there were earlier 6 Q. Was he the only one that had any input on 7 versions or drafts of this map; correct? 7 this map? 8 A. No. There are other maps that -- One shows 8 A. He's the one that used the CAD program to 9 download the data from the total station 9 typical headlight pattern. O. That's the one I want to look at. 10 and complete the map from that data. 10 Q. All right. And on Defendant's Exhibit --A. And there's one that doesn't show the 11 11 Gary Johnson was at the site; right? He 12 trucks at all. It just shows the marks on 12 actually did a site inspection; correct? the road and then the road. 13 13 A. It takes two people in most cases to do a Q. I understand. This -- The one that --14 14 mapping of the site. We have a total A. This is another one that shows just the 15 15 road and the markings. station that will measure with laser 16 16 Q. Right. sighting to points on the highway up to 17 17 about 600 feet. But once you get beyond Show me the one that's got the 18 18 that, you have to have a reflector coil. headlight positions of the Kenworth. 19 19 A. Well, we don't know what the Kenworth's And if the curvature of the road obscures 20 20 tractor position was. But the the points you want to measure, you've got 21 21 to have a second man there, so we always representations of what the headlight 22 22 pattern might have been for different 23 send at least two guys to do a site map. 23 Page 208 Page 206 1 Q. Did Gary Johnson make an effort to put the 1 positions of the tractor are shown in, I information on Defendant's Exhibit 10 as 2 think, that map you're holding. 2 3 Q. This is the one I want to look at. I want 3 accurately as possible based on what he had to mark this one, but I'd rather mark your to work with? 4 4 copy because it's in color. I don't have a 5 5 A. Yes, sir. The measured points that are used to delineate road edges and fog line 6 copy that's in color. And we can -- Our 6 marks and that sort of thing -- the total 7 7 court reporter will get you your original back if you need it, but she can, I think, 8 station measures those to within a small 8 9 9 copy these in color. fraction of an inch. O. On this particular Defendant's Exhibit 10, MR. BROUGHTON: Can't you? 10 10 11 COURT REPORTER: Yes. 11 there's a -- there's a line in green in the Q. So that we'll all have a color copy. Henry middle of the page above the scale. At the 12 12 may have a color copy, but I don't. It's 13 bottom of the page, it says headlight 13 this one right here. That's it. I'm illumination 250 feet, MacInnis SAE. 14 14 A. That's low beam. 15 marking Exhibit 10. 15 (Defendant's Exhibit 10 was marked 16 Q. Did you participate -- Did you help 16 Mr. Johnson obtain that bit of data? for identification.) 17 17 18 Q. This was one of the maps. Was this map 18 A. No, I didn't. done -- Do you know -- Do you show what Q. But your opinion is that's low beam? 19 19 date that map was done? 20 A. Yes. 20 A. No, it doesn't show. 21 O. Do you know why Mr. Johnson used low beam? 21 Q. Was it before or after the one we marked as 22 22 A. I don't know. 23 23 Defendant's Exhibit 9? Q. Do you know if he's referring to the

	SHOW OF Edward E. RODINSON	T	
	Page 209		Page 211
1	headlights on the Kenworth or on the	1	and illuminating 350 feet as you have
2	Peterbilt?	2	assumed they would, the impact speed of the
3	A. Neither one.	3	Peterbilt and the Kenworth would have been
4	Q. The next line underneath there says PRT	4	fifty something in the 52 mile an hour
5	distance. What's PRT distance?	5	range; correct?
6	A. Perception-reaction time.	6	A. Yes.
7	Q. All right. He used 153 feet and one and a	7	Q. And without going through the calculations,
8	half seconds.	8	if the headlight illumination on the
9	A. Okay.	9	Peterbilt is less than 350 or if he had his
10	Q. Do you know why he used that information?	10	low beams on and it gets even down in the
11	A. No. That's a typical default value for	11	250 range, we can only assume that the
12	perception-reaction time.	12	impact speed is going to be even higher?
13	Q. Did you consult with him on that?	13	A. Yeah. If we assume his brakes are out of
14	A. I don't recall doing so.	14	adjustment, it's going to be even higher
15	Q. Do you know why he was putting the	15	than that.
16	headlight illumination in this	16	Q. Even doing Even with Mr. Thompson doing
17	perception-reaction distance on this	17	everything a reasonable truckdriver would
18	particular map?	18	do at the time of this accident?
19	A. No, I don't.	19	MR. PENICK: Object to the form of
20	Q. The next line says stopping distance, .5	20	the question.
21	drag, 70 miles per hour, 326 feet.	21	A. We've been through that before. Yes, that
22	A. Right.	22	is correct.
23	Q. Did I state that correctly?	23	Q. All right. Now, on this map, is there any
23	Q. Did I state that correctly.		
-	Page 210		Page 212
1	A. Yeah.	1	part of this depiction on Defendant's
2	Q. And that's something that you or Gary	2	Exhibit 10
3	Johnson put on that map?	3	MR. PENICK: Well, let me object
4	A. He put it on the map. I'm sure he	4	to add to my objection on
5	calculated it. That's I think that's	5	that last question, because it
	the figure I got a while ago for the skid	6	presupposes an impact. And
6 7	distance, wasn't it, for 70 miles an hour	7	the calculation was what would
8	at .5?	8	be the speed at the time he
9	Q. Do you know why he used .5?	9	reached the point where the
10	A. That's within the range of trucks. If	10	truck was, not whether or not
1	they've got a wheel or two out of	11 -	it would actually impact with
11	adjustment, then it's lower than .5.	12	the truck
12	Q. Do you know why he used Do you know why	13	Q. On Defendant's
13		14	MR. PENICK: the Kenworth.
14	he used .5 on this particular case?	15	Q. On Defendant's Exhibit 10, is there
15	A. No, I don't.	16	anything on there that in your opinion
16	Q. But .5 is certainly reasonable and	17	Mr. Johnson has depicted inaccurately or
17	acceptable?	18	incorrectly?
18	A. It is. You find that on a lot of trucks,		A. No. 1.5 is an accepted part of the range
19	because they don't all keep their brake	19	of perception-reaction time5 is within
20	adjustment within specifications all the	20	what we observe on trucks actually on the
21	time.	21	road, as well as .6, below .5 for wet
22	Q. And at the .5 drag factor that we	22	roads.
23	calculated before with the high beams on	23	Toaus.

- Q. Do you know the distance from the windshield of the Kenworth to the front bumper of the Kenworth?
- A. I don't recall that number, but it's probably somewhere in the literature. I don't see a vehicle data. I thought we had a vehicle data section that gave the published truck data. I don't see it right now. It's -- a digital truck index would normally pull that up and put it in the file.
- Q. Eight to ten feet? 12
- 13 A. From the windshield to the front of the 14 truck?
- 15 Q. To the front bumper.
- 16 A. In that ballpark.
- 17 Oh, here's what I'm looking for.
- O. What section was that in? 18
- 19 A. I don't know. It's in here somewhere. But 20 it's a copy of the Kenworth model T600. Distance from the front axle to the front 21 22 bumper, 46 inches; to the back of the cab
- from the front axle, 74 inches. All we 23

headlights were pointed? 1

- A. I don't know exactly where the headlights were pointed or exactly where along in these photographs the general point of rest was, so I -- I don't know whether there were trees or bushes out there. All I know is the embankments that are there.
 - Q. Does Defendant's Exhibit 10 show three possible -- show three possible configurations of the Kenworth cab after the rollover?
- 12 A. Yes.
- 13 Q. You just don't know what terrain, if any, there was, bushes, trees and such out in 14 15 front of any of those headlight positions?
 - A. I haven't attempted to locate that point with respect to these pictures.
- Q. Right. The drawing -- I know it's not --18 Y'all were not able to tell the precise 19 final resting place of the Kenworth and the 20 trailer after the rollover. But the 21 22 depiction in Defendant's Exhibit 10 that Mr. Johnson did at your direction shows the 23

Page 214

Page 216

- 1 could do is sort of scale it. It doesn't 2 give that particular dimension. And I
- 3 don't know how authentic that drawing is 4 from a scale of factors other than the ones
- 5 they give. It looks like it's just over
 - about five feet, about five feet two inches
- 7 from the front of the hood to the base of 8 the windshield.
- 9 Q. All right. And the -- Do you know what the 10 terrain looked like off the right side of 11 I-85 going north towards Atlanta at the point where the Kenworth rolled over? 12 13
 - A. All I have is the aerial photographs. I can see the shoulder -- paved shoulder of the road. I don't see in that photograph -- Okay.
- Q. If the Kenworth headlights were on, do you 17 18 know what they -- after the rollover, do 19 you know what, if anything, they would have illuminated out in that direction? 20
- 21 A. Well, the trees and bushes and such.
 - Q. Do you know if there were any trees and bushes and such in the direction that the

- cab of the Kenworth from the windshield out 1 2 to the bumper over the right fog line, 3 correct, in one of those depictions? 4
 - A. Yes.
 - O. So that would have put the front of the Kenworth five or six feet out into that right shoulder; correct?
 - A. That's true.
 - Q. And isn't it fair -- And I'm just talking about being fair and reasonable. Isn't it fair and reasonable that a driver in this Peterbilt at 70 miles per hour in the dark of night under these circumstances would not be held to a decision to steer his vehicle off the right side of that highway as you earlier had testified you thought he should have done?
 - A. Well, as you've hypothesized in so many questions, we don't know that that's the exact position before impact, so I don't know that that's -- that that was blocking the shoulder.
 - Q. And we don't know that the Kenworth wasn't

Dep	osition of Edward L. Robinson		June 22, 20
	Page 217	7	Page 219
1	blocking more of the shoulder, do we?	1	perceive there's something in the road at a
2	A. No.	2	distance far enough to slow down to keep
3	Q. And you and your people have had months to		this from being an accident of that
4	study that situation and even map it with	4	severity.
5	computers and still couldn't decide whether	5	Q. You don't really believe that he should
6	there's enough room over there on that	6	have steered his vehicle off the right side
7	shoulder for an eighteen-wheeler to get	7	of the highway at 70 miles an hour, do you?
8	by. And you're expecting Mr. Thompson to	8	MR. PENICK: Object to the form of
9	make that decision in, what, one and a half	9	the question. Assuming that
10	seconds?	10	he would be traveling 70 miles
11	MR. PENICK: Let me object to the	11	an hour when he got to the
12	form of the question. He	12	Kenworth. And the testimony
13	didn't say there wasn't enough	13	has been that he would not.
14	room to get by. The question	14	If he had applied his brakes,
	assumes facts not in	15	he wouldn't have been going 70
15	evidence.	16	miles an hour.
16		17	A. I've already answered your questions.
17	Q. My question is, you had you and your	18	Q. At what speed, in your opinion, would it
18	associates using computers had two and a	19	have been reasonable for him to drive his
19	half months to try to determine the final		eighteen-wheeler off that I-85 in the
20	resting place and location of that	20	middle of the night without knowing what's
21	Kenworth. Mr. Thompson had one and half	21	over there?
22	seconds. Do you think it's fair and	22 23	A. He's got headlights, hasn't he, or does he
23	reasonable to put the burden on him of	23	A. He's got headinghts, hasn't he, or does he
	Page 218		Page 220
1	driving his steering his vehicle off the	1	have them off? I can't answer that
2	side right side of that highway at 70	2	question. I don't know what his You
3	miles per hour?	3	know, just to pull a number out of the hat,
4	MR. PENICK: Object to the form of	4	I don't know.
5	the question. Assumes facts	5	Q. Is there such a thing as a minimum legal
6	in evidence that he was still	6	braking deceleration rate for
7	going 70 miles an hour when he	7	tractor-trailers?
8	got to the vehicle to the	8	A. There is.
9	Kenworth.	9	Q. What is that?
10	Q. Do you have an answer to my question, or	10	A. I don't recall. It's in the federal
11	can you answer my question?	11	regulations.
2	A. Well, your question assumes that the truck	12	Q. If At that minimum legal braking
13	on its side was blocking the shoulder. If	13	deceleration rate, would a tractor-trailer
14	that's the case, no. But we don't know	14	rig leave skid marks?
15	that that's the case.	15	A. No. It wouldn't have the brakes adjusted
16	Q. And what's what's a reasonable	16	enough to do that. And to get to a value
7	truckdriver at 70 miles an hour with one	17	that low, the pushrod travel on several of
.8	and a half seconds of perception-reaction	18	the brakes would have to be in excess of
9	time what kind of bar do you set for him	19	out-of-service criteria.
20	to make those decisions?	20	Q. And, again, you have no information on that
1	A. Well, I think a truckdriver is obligated to	21	because you didn't have you have not
22	be more alert than a passenger car driver	22	inspected the Peterbilt or its trailer?
23	and that he should have been able to	23	A. No. I know basically that the minimum
	and that he bhould have been able to		

		·	
	Page 22	5	Page 227
1	times of an oncoming truckdriver; correct?	1	misidentified any cloud as being fog;
2		2	correct?
3	He said	3	A. Not a cloud of dust. He could have
4	Q. Correct?	4	misidentified that truck as being something
5	MR. PENICK: your driver didn't	5	in the road, which apparently he did. He
6	say anything about dust being	6	didn't stop for it.
7	kicked up, so he assumed that	7	Q. You're saying under certain conditions that
8	it wasn't.	8	the dust a dust kicked up cannot give
9	Q. You haven't talked to my driver, have you?	9	the appearance of going through a wisp of
10	MR. PENICK: In his affidavit he	10	fog?
11	said it.	11	A. I haven't seen any like that, no.
12	A. No, I haven't. I read his affidavit, but I	12	Q. Have you ever driven an eighteen-wheeler?
13	haven't talked to him.	13	A. Yeah. Q. Have you ever driven behind an
14	Q. Well, would that change your opinions?	15	eighteen-wheeler that went through the
15 16	Would it change your opinions if dust was kicked up to some extent by that Kenworth	16	median like Mr. Morris did?
17	either going through the median or coming	17	A. No, I don't believe I have.
18	back up onto the surface?	18	Q. And you've never seen a dust cloud kicked
19	A. And it's still there when the Peterbilt	19	up by an eighteen-wheeler?
20	gets there?	20	A. I have.
21	Q. Yes.	21	Q. At night?
22	A. Yeah. I think the Peterbilt driver would	22	A. I probably have. Not as a driver behind
23	be very foolish not to say something is	23	Not in a Not driving an
<u> </u>			
	Page 226		Page 228
1	going on with dust in the road and start	1	eighteen-wheeler, but I've seen them kick
2	slowing down and looking for what's causing	2	up dust clouds running off the road.
3	that dust.	3	Q. Is there any test data or literature data
4	Q. So it would affect your opinions? Is	4	or studies or reports that you're aware of
5	that	5	on this type condition about the
6	A. Yeah.	6	perception-reaction time of a of an
7	Q. Would that mean you're going to have to	7	approaching truck or automobile driver to a
8	reformulate all of your opinions in this	8	vehicle overturned in front of them with
9	case if you get some additional facts?	9	just the bottom facing oncoming traffic?
10	A. No. Well, if additional facts come in, but	10	A. I don't know of any.
11	that's certainly not a fact. That's just	11	Q. So we really don't know how difficult that
12	another speculation.	12	would be to perceive and react to by
13	Q. Well, you're speculating that there was no	13	anybody's study or reported studies?
14	dust kicked up by the	14	A. I don't know of any test data.Q. The We talked about, I think, the
15	A. I assume that there was not a significant	15	running lights and the headlights and the
16	amount of dust kicked up. The Peterbilt driver should have noticed that and would	16 17	taillights. Have you done any testing or
17 18	have, I think, under reasonable	18	studying or are you familiar with any
19	circumstances	19	literature that would support an opinion
20	Q. At a certain point	20	that any of the non-illuminated reflectors
21	A said something about it in his	21	or reflector tape on that Kenworth would
22	statement.	22	have been visible to Mr. Thompson as he
	DMINITE.	سكامت	THE TO COURT TANKS TO ATALL TANKS AND AND AND
23	Q. Well, he could have mis he could have	23	approached?

Page 229 Page 231 the same eight feet off the ground as they MR. PENICK: Are you asking about 1 1 do when I have them on my desk looking at 2 nonreflecting tape or 2 them from the bottom. 3 3 reflecting tape? 4 Q. Those don't -- lights don't pick up road 4 MR. BROUGHTON: No. No. debris and road dirt and grime? 5. 5 A. The light lenses? A. They may do that. 6 O. Yeah. There's some -- Aren't there some --6 Q. So you have no idea what those would look Aren't there some reflectors --7 7 like, do you, to an on -- to an approaching 8 A. There are reflectors --8 9 Peterbilt? 9 O. -- used that don't -- And I don't know if they were on this truck or not. You don't 10 MR. PENICK: Are you talking about 10 either, because you didn't get a chance to the bottom of the reflector 11 11 look at it. I understand that. But 12 lights? 12 there -- Some trucks have reflector tape. 13 THE WITNESS: Yeah. 13 MR. BROUGHTON: Which is the part Some trucks have as I understand it glass 14 14 that he would be seeing as 15 reflectors that don't have a light bulb 15 he's coming up on that illuminating. Am I wrong about that? 16 16 A. I don't know. I'm aware that they need --17 vehicle. 17 A. I don't know how much light they would they're required by the federal regulations 18 18 reflect. I would expect them to reflect to have a marker light at the front rear 19 19 some, but I don't know how much. corners and midway on the trailer. And 20 20 O. We don't have any tests or studies to normally those little lights extend an inch 21 21 or so above the surface of the trailer. verify what would be --22 22 A. I haven't looked up test data on that, no. They are highly reflective even if the 23 23 Page 232 Page 230 1 (Off-the-Record discussion.) lights aren't on. 1 (Brief recess was taken.) 2 One of the tricks I use or techniques I 2 Q. And I apologize if I've asked this, but use to locate and identify those lights in 3 3 broad daylight is the use of a flash. If 4 I've got to know if I haven't asked it --4 you use a flashgun, it looks like those if you haven't answered this. Do you know 5 5 why Morris' vehicle left I-85 down -- and 6 6 lights are spotlights shining back at you. 7 went down into the median? So they do reflect a lot of light when you 7 A. Yeah, I've answered it. I don't know. shine a light on them. 8 8 O. You don't know. Q. What does the bottom of one of those look 9 9 10 And we don't know if he had an like eight feet up in the air after a 10 equipment problem or fell asleep or had a 11 vehicle has overturned? 11 medical emergency or any of the above? 12 A. Well, it's not eight feet up in the air to 12 A. Well, that's covered in the answer I don't the driver of the Peterbilt, because he's 13 13 nine and a half feet up in the air. The 14 know. 14 Q. Okay. You know, I've had plenty of experts ones that I have -- that I recall have some 15 15 that don't know in the deposition that sort of pattern in the plastic cover all 16 16 later know something at trial and that's the way inside around the surface of 17 17 why I have to keep -- make sure I've got 18 the lens. 18 your answer on that. 19 19 Q. Have you ever rolled a vehicle and looked at the bottom of those reflector lights 20 A. So you ask it --20 O. Does Messerschmidt or Johnson -- Do either eight feet off the ground to see what you 21 21 one of those guys know why the vehicle left could or couldn't see? 22 22 23 23 A. Well, the bottom of those lights would look the highway?

Page 245 Page 247 that is from the Peterbilt driver applying 1 that ---2 his brakes and slowing and steering to the 2 A. On the diagram. right shoulder. As the accident report Q. Where does it show in the accident report 3 3 where the front bumper of the Morris 4 diagram indicates, the initial collision 4 5 5 was in the left inside lane and since this tractor was at impact? A. It shows a point of impact in the left lane 6 is underneath the cab of the truck would 6 of the trooper's diagram. And if that 7 indicate that the drawing that shows the 7 impact was underneath the driver's 8 light patterns doesn't accurately represent 8 9 the position of the Morris truck when it 9 position, then the front of the truck would have been some seven or eight feet maximum 10 came to rest after sliding before it was 10 beyond that point which would have not even hit by Peterbilt truck. 11 11 12 And, in fact, we've said a number of 12 completely blocked the right lane. Q. Where does it show in that accident report 13 times in there that we don't know -- And, I 13 14 mean, we've covered it a dozen or more 14 where the front bumper of the Morris --A. It shows -times in here -- that we don't know exactly 15 15 16 where the Morris truck stopped after it 16 O. -- Kenworth tractor was? 17 overturned. It's just absolutely 17 A. -- where the point of impact was. And we have to deduce that from the dimensions of unreasonable to assume that it was over in 18 18 the truck. He doesn't try to show the the right lane when it was hit when all of 19 19 the markings and debris are shown in the position of the truck after it comes to 20 20 left lane and in the median. So there stop from the slide. 21 21 22 should have been opportunity for the 22 Q. And -- Well, let me ask you this. Will you rely on the testimony of the investigating 23 Peterbilt driver to slow and steer right 23 Page 248 Page 246 1 and go around Morris' truck. 1 troopers as to explaining their drawing and Q. When did you formulate that opinion? diagram and rely on their accuracy when we 2 2 3 A. I don't have a date tabbed on that. I 3 get their testimony? A. I will have to, because this diagram is the 4 don't know. 4 only thing we have on site. 5 Q. Where did you write down that opinion? 5 Q. And after -- Today is June 22, 2006; 6 6 A. I didn't. O. You --7 7 correct? 8 A. That's implicit in these other things. A. As far as I know. Q. And you first rendered your opinions --9 Q. So that makes -- that makes Johnson and 9 your sworn opinions under oath, an 10 Messerschmidt's map drawings totally 10 affidavit in March of 2004; correct -- or inaccurate; correct? 11 11 12 A. It makes them diagrammatic of one factor, 12 2005; correct? which doesn't represent, as we've said over 13 13 A. I'm -- Yeah. and over and over, where the truck came to Q. And that was after your thorough 14 14 rest after it overturned. I think you'd be investigation that was using all the 15 15 very hard pressed to find any accuracy in methodologies used by accident 16 16 the road dimensions, the location of the reconstructionists and after a careful 17 17 strike marks, the location of the 70 mile review of the Alabama Uniform Accident 18 18 per hour marks, any of the other things 19 19 Report; right? that are in the diagram. And we said we 20 20 A. Yeah. don't know exactly where the truck ends Q. And there's nothing in that sworn affidavit 21 21 or report issued back in March of 2005 that 22 22 mentions anything about an impact in the 23 23 Q. Where does it show in the accident report

June 22, 2006

- 1	Page 24	,	Page 251
